D&B Rating

The D&B Rating Certificate is the quality certification mark for commerce and stands for reliability and stability. In order to be awarded with this certificate and the related D-U-N-S number, a company must have been rated in the lowest risk category by D&B for at least 12 months. This commendation authenticates the RKB Group as a trustworthy business partner. The D-U-N-S number is recognized by the world's most influential standards-setting organizations, including the European Community, United Nations and the US Federal Government.

Quality system

ISO 9001: Quality Management System is issued to the organizations that can demonstrate their ability to consistently provide products meeting customer and applicable statutory and regulatory requirements.

Health and safety system

ISO 45001: Health and Safety Management System defines a set of requirements for workers' occupational health and safety.

Environmental system

ISO 14001: Environmental Management System states that an organization is able to develop and implement a policy and objectives taking into account specific requirements and information connected to significant environmental aspects.
